

*Culpepper Revived.*

BEING AN  
**ALMANACK**

for the Year of our  
**BLESSED SAVIOURS**

Incarnation 1689.

And from the Creation of the World according  
to the best of Ecclesiastical History 5638.

Being the first after Bissextile or Leap-year.

Wherein is briefly shewed, the general State of the Year,  
the Solar ingresses, Eclipses, Full Sea at London Bridge,  
Tides and their returns, the Sun and Moons rising and  
setting, with Astrological Observations, and the probable  
alteration of the air.

Also the certain time of any Mart or Fair in any City or  
Town in England, with a description of the most emi-  
nent Roads therein.

To which is added Rules for Physick and Husbandry with  
many other useful Observations necessary for the com-  
pleating such a work.

Calculated and referred to the Meridian of the famous  
University and Town of Cambridge; where the Pole  
Arctic is elevated above the Horizon  $52^{\circ} 19''$  but may  
serve for any other part of Great Britain.

By *Nathaniel Culpepper*, Student in Physick,  
and the Celestial Science.

*God moves the Heavens; with His mighty hand,  
Both Planets, Earth, and Ocean doth command.*

**CAMBRIDGE**

Printed by *John Hayes*, Printer to the  
University. 1689.

The Julian or old Ac-  
count used in England.

The Law's a thing Divine, made to Repel  
The sinfull Lusts of Such as do Rebel  
Against right Reason, Justice, Faith; their Prince,  
And for the Injur'd Man a good Defence,  
It's use is, to Correct and keep in fear  
Such as don't value what they Act, or sweat,

The

King Charles the Second Crowned	1660
King Charles the Second Married	1661
The first year of the second Parliament	1661
The second year of the second Parliament	1662
The third year of the second Parliament	1663
The fourth year of the second Parliament	1664
The fifth year of the second Parliament	1665
The sixth year of the second Parliament	1666
The seventh year of the second Parliament	1667
The eighth year of the second Parliament	1668
The ninth year of the second Parliament	1669
The tenth year of the second Parliament	1670
The eleventh year of the second Parliament	1671
The twelfth year of the second Parliament	1672
The thirteenth year of the second Parliament	1673
The fourteenth year of the second Parliament	1674
The fifteenth year of the second Parliament	1675
The sixteenth year of the second Parliament	1676
The seventeenth year of the second Parliament	1677
The eighteenth year of the second Parliament	1678
The nineteenth year of the second Parliament	1679
The twentieth year of the second Parliament	1680
The twenty-first year of the second Parliament	1681
The twenty-second year of the second Parliament	1682
The twenty-third year of the second Parliament	1683
The twenty-fourth year of the second Parliament	1684
The twenty-fifth year of the second Parliament	1685
The twenty-sixth year of the second Parliament	1686
The twenty-seventh year of the second Parliament	1687
The twenty-eighth year of the second Parliament	1688
The twenty-ninth year of the second Parliament	1689

Calpepper 1689

*Of the Eclipses of the Luminaries which happen  
this Year 1689.*

**T**Wice this Year will the Moon only be Eclipsed as followeth.

The first Eclipse will happen on the 25<sup>th</sup> of March, near 7 at night; and if the Air be clear may be seen a Total Central Eclipse in our Hemisphere.

The second Eclipse of the Moon is on September the 19<sup>th</sup>, about 2 of the Clock in the Morning, and should be a very great Eclipse, and seen also in our English Hemisphere almost Totally darkned. These Eclipses are very considerable, and Celebrated in Equinoctial Signs, and therefore must have the more remarkable effects, of which consult other Writers for this present Year.

Note that the Planet Venus is Occidental of the Sun and therefore our bright Evening Star, till the 13<sup>th</sup> of June; and then she becomes Oriental, and continues our Morning Star till August the 1<sup>st</sup>.

**M**rs. B. has a secret way of curing the Golden (which have on foot so many eminent Cases in the Dropsie, Scurvey, and most other Distempers) are no where prepar'd, but at this time she daily liveth in the City of London, near the Old Jewry, but such as have it follow her; Now did Mr. B. communicate the Secret to any mortal, except the person who continues it at the place aforesaid. It's sold for one Shilling the glass. Beware of Counterfeits.

The

September 1683.

The Spring Quarter this year begins About the 9<sup>th</sup>,  
at 48. past 7 in the Afternoon, according to *Astronomia*  
*Britannica*, and a Scheme of the Heavens for that time  
is here presented,

But by other Tables repeated the most Correct, at a hours  
9 quarters Later, and then about 6 degrees of 7<sup>th</sup> will  
Culminate, and about 17 degrees of that Trenchard Sign  
Scorpio Ascending: at these that desire it may settle  
themselves by setting the Figure, and observing narrowly  
to which events best conform.

World Brief

SEPTEMBER 1622

*Brief observations upon the Scheme chiefly Intended  
to inform Tyros or the Younger sort of Students  
in the Celestial Science, of which this Nation (in  
this present Age) abounds with many, and those  
I presume (for the most part) very hopefull.*

In this Scheme I find the Angles, Cardinal Signs, and  
some Planets, viz. Mars and Mercury posited therein,  
and having to a Quadrat Aspect. Saturn is in Scorpio in  
reception by House with Mars, the Moon is in Trine to  
Saturn and Sextile of Venus Lady of the Ascendant in her  
own dignities in the eighth House; Mercury in Aries in op-  
position to the Ascendant but in Sextile to Jove in the  
fourth House; and Lastly all the Planets (except Venus)  
under the Earth: And thus appears the Figure of the Hea-  
vens when Royal-Sol the King of the Planets, makes his  
Ingress into that Regal Sign, which his own exaltation;  
whence I shall deduce this following Plain yet Rational  
Judgement.

The position of the Heavens imports nothing of violence  
or suddain disasters to break forth amongst us during this  
Revolution; whatever Peoples fears and Jealousies may be,  
the Angles are indeed Moveable and we may expect to see  
much variety in the changing of Officers and Persons, in  
their several Places and Implemments, as also many de-  
bates and controversies bandied about by Tongue and Pen,  
in Matters of Conscience and Religion; in all which every  
one will indeavour to promote his own interest.

We see in our days many Persons are mounted to the  
very Top of fortunes Wheel, but what Estate remains so  
permanant that it cannot be changed? or continues so  
without alteration?

In the dissimilarity of Rays (as one well observes)  
as well as Quality of Matter that gives variety of Action  
in this flourishing Age or World we live in: Mars must  
have his heats and Saturn his sullen fits as long as this  
World endures: But let us notwithstanding study peace,  
and

# Calpepper 1689.

and endeavour to live to under our Superiours.  
We may expect to see many remarkable actions upon the  
stage of the World this Revolution, but I presume we  
in England may notwithstanding all fears be yet happily  
preserved from any Sweeping sickness to carry us into the  
other World, or any violent or dangerous occurrences  
either upon our Persons or Estates; the Scheme promi-  
sed much calmness in general. And those that resolve  
to break their Bounds and make excursions beyond the  
Sphere of their Activity, let them expect the Merits of  
their deserts, which pass me in mind of the words of a  
Poet, who says

*Small dangers, small are those, if we be wise,  
Then greater ones, when our crimes pass;  
Let error teach, for the Steep descent  
Trust's the great Abyss, from which all fall.*

All rational Men will own that it is no detraction from  
Divine Providence, that the Course of Nature is exact  
and Regular, and that even in its greatest Changes and  
Revolutions it follows the same Course, and is preserved in  
uniformity and order, and that the Divine will in refer-  
ence to the natural World is eternal and unchangeable.

I need not expatiate or enlarge much upon this subject,  
but I shall say every thing that I can say, that I may be  
able to comfort myself with the thought, that I have done  
something for my Country, and that I have done it in  
the best manner I was able. I shall say every thing that  
I can say, that I may be able to comfort myself with the  
thought, that I have done something for my Country, and  
that I have done it in the best manner I was able. I  
shall say every thing that I can say, that I may be able  
to comfort myself with the thought, that I have done  
something for my Country, and that I have done it in the  
best manner I was able. I shall say every thing that I  
can say, that I may be able to comfort myself with the  
thought, that I have done something for my Country, and  
that I have done it in the best manner I was able.

Many Men (I may say too many) in this  
World in the World then they need to do, I may say  
with the Prophet, *Every man is a World*, and that  
comes into the World in the pleasure of another, and goes

## Calcepper 1680

perfect maturity and ripeness, and all kind of Cattle to  
 flourish. Now Merchants and Mariners do undertake voyages  
 to bring home Foreign Commodities, and increase their  
 wealth. Now Flowers and Fruits are the most pleasing, and  
 the Birds most melodious and joyfull, &c. Now I advise  
 you to beware of Surfeits, and use often cooling herbs, and  
 meats, and drinks. Strong Waters or Wines are drunk  
 sparingly. If you are willing to continue health and strength,  
 Yet sometimes *Quintessence* can be made.

### Of Summer

THE Summer or Harvest Quarter begins  
 when the Sun reaches the first degree of the zodiac  
 of the Signe Libra, and commences this Year October  
 the 14th, a. h. 1680. This season all Men that know  
 anything of the seasons, will say, and the world  
 number of Harbingers of that terrible Winter. Now  
 the beauty of the world begins to fade, and our Common  
 Cattle have cast their rich robes, where with the war before  
 being furnished in the Spring season, laying them up in the  
 winter of masts to some other use, and the vict  
 im of winter is now on the Body Diseases which  
 usually do themselves in the Quarter, and are more  
 than usual, and almost all that can be said, but all the  
 Obstructions of the Heart and Lungs, Coughs, Sore  
 and Joynt Aches, the Consumption, the Drops, the  
 Spleen, Bitches, Scabs, Fluxes, &c. To prevent Diseases,  
 our meats moderately warm, and drink all of the same  
 quality. Beware of opening the pores of the body too much,  
 thereby taking in dangerous or infectious air. And re-  
 member

If thou dost any Body Disease  
 Use all thy skill to get a perfect cure.

### Of Winter

THE Winter Quarter or Solstice begins always when the  
 Sun having finished his greatest Southern Declination,  
 makes his approach to us again, and at the same time makes

the greatest quantity of Shadow, and least portion of Sun-light  
unlike (as the contrary is in all respects when he touches the  
Northern Tropick 24<sup>th</sup>) so that now when the Sun touches  
the first Tropic of Capricorn the days are shorter and the  
night longest to us on the North Side the Equator, and  
the contrary to our Antipodes. This Quarter commences  
December the 11<sup>th</sup>, 2<sup>d</sup> h. Noon, and the natural temperature  
hereof is cold and moist. It is an uncomfortable Season,  
too frequently dangerous to Travellers both by Sea and Land  
and more troublesome to old persons than to young, by rea-  
son that lively heat of youthful blood doth mitigate and  
resist the superfluous malignancy of cold moist humors  
whereas the coldness of Age is aggravated thereby. Now  
the parts of the body are raw, and cold meats and dishes  
are unwholesome, and no Physick is now to be taken, unless  
necessity urge. The Diseases incident on this Quarter are  
Aches of all sorts, Gout, Stitches, and other Aches, inflam-  
m'd by Rheumatic Matter diffused into several parts of the  
body, whence arises in the sides, Palsies, Gouty, Gouty  
Headache, Windings, Obstructions in the Bladder and  
like Disorders, now the best's use rhubarb must be  
dry powdered with a little Spirit, or also Wine or Spring Water  
now being taken moderately, so much further the spleen, and  
liver, the Body now consists of Gold, and flesh is full of  
affairs which too frequently all of Mankind do sustain. And  
thus I conclude with this significant verse of Pindar, in I

37  
 The Conquering Worms Reduce us all to Peace,  
 Secure an Interest in the other World,  
 And let this, as it is, be sold and shared,  
 He's Great and good, who can do all this,  
 And can with joy expect Eternity.  
 This Reader is the best I ever sell,  
 Think on't and profit so, and so I will.

Let's be making Gloria eat an eye  
and stick it in her pants with a pin.

# *Calpepper 1689.*

## *Excellent Notes of Husbandry and Gardening for each Month in the Year.*

### *January.*

In this Month cut down Timber and it shall not cleave nor be eaten with Worms: in the last quarter of the Moon set or sow kernels and Bay-trees, Prunes and those that Quick-set, Rust-trees, Peaches, Philberts & Plum-trees, if the frosts be not too hard, prune and top them before full Moon sow and set Beans and Pease and dung Land: in the last quarter geld Cattle necessary fallow Land for Wheat and Rye, trench Gardens with dung, and remove Bees: and for your own health keep your body warm, let good and wholesome Diet, your physician, moderate exercise and labour your lawe to cause hypocrisie.

### *February.*

Sow all sorts of Pease, and other Pulse: sow Mustard seed, cast up Dikes, set & plant Vines, Hops, Gooseberries, and any Fruit that grows upon Bushes, prune and trim all sorts of fruit-trees from Moss, Canes and all superfluous branches, graft in the latter end of the Month, sow Onions in cold and Land, take heed of cold, for best Pulvermarick means.

### *March.*

In the new of the Moon (the wind any way but South or West) graft Pears, Wardens, or Apple-trees, make an end of sowing all manner of Pulse, and begin to sow Oats, Barly, Parsnips, Onions, Carrots, Cucumbers, Melons, and all kind of Pot-herbs, dig Artichokes and Sage, geld Lambs, let Blood according to strength and necessity, the sign and weather being allowd (let repaired the Learned Physician) look what cannot be cured in the Spring by Physick, will hardly be cured all the Year after.

### *April.*

Sow Early Hemp and Flax, Pele Hops, set and sow all kind of Garden Herbs, open Hives, and let Bees labour for their living, let Tanners now provide them with Bark, and all good Housewives look to their Daries, bleed and purge with advice: those that are troubled with Aches or the Gout, let them go to the Bath in the first or the three following Months.

### *May.*

Sow Early on all light Lands and bearing Grounds, Hemp and Flax, and all manner of Eng Seeds and Herbs, take Lambs from their Dams, fallow Land for Wheat and Rye, leave topping of Trees, teach Hops to climb, but cut off the superfluous Branches: till early, walk the Fields, especially by running Streams: Sage and Sweet Senter is now an excellent Break-fast, Sage and clarified Whey, as also Soury Grate Ale, and Wormwood Beer, are wholesome Drinks to be drunk falling.

### *June.*

Sheer Sheep, bring home Fewel, weed Corn and Gardens, set Rose-mary, Carnations and Gilly-flowers: sow Lettice and Radish, lead three or four days after the Full, for then they will not run to seed, make Hay, carry Sand, Lime, Marle and manure of what kind soever, refreshing your Land, cut neither Hedge nor Tree in this and the two

# Calpepper 1689.

next Months beware of great thirst, use thin and light Diet, moderate exercise, and chaste thoughts.

*July.*

Make your Hay and house it while it's fair weather, pull Herbs that is ripe, gather Garden Beans, get Rue and Wormwood, and Go to sleep on your Floor, and sleep Morn and Even, fence your Cattle, use moderate Diet, take heed of great thirst, for nothing brings the Pestilence or pestilent Diseases sooner than extreme thirst, if it comes near, and cold taken suddenly upon them, take no Physick, but not bat upon violent occasions.

*August.*  
Follow close your Corn Harvest, use winter herbs in the new the Moon, gather Garden seeds, mow Barley and Oats, gather your Summer-fruits, refrain from sleeping in the day time after Mear, avoid riot and excess.

*September.*

In the beginning of this Month and end of the former, gather Hops when they were brown, the weather being fair and no dew on the ground, kill Bees, make Verjuice, sow Wheat and Rye, remove and let all slips of Flowers between the two Lady days, put Swine to mast, remove Trees every new Moon from September till February, especially in the new of the Moon, the weather hot and warm, walk South or West, use Physick moderately, forbear Fruits too plentiful or rotten, Inupric and excess of Diet.

*October.*

Sow Wheat and Rye, the sooner the better, for fear of rain, get Acorns and Nuts, gather winter Fruit, the weather dry, in the afternoon, and in the wain of the Moon, cut Rose-trees if you desire to have store of Roses, do this once in two years, refuse not any needfull Physick at the hands of the Learned, And use all moderate Sports to revive the vital Spirits.

*November.*

Make Malt, kill Hogs, reach Gardens with dung, let Crabs and Rocks, sow Wheat and Rye in exceeding hot sandy Grounds, cut down Timber for Plows, Carts, and other Implements for Harvest, dry, use wholesome Meat and Drink, with good exercise to preserve health.

*December.*

In this and the next Month cut down Timber, in the last quarter of the Moon uncover the Root of Fruit-trees: let Beans and Peas cover all the best Flowers and Herbs from Frost and Storms with old rotten Horse-dung, look well to your Cattle, water and keep moist your Meadows, let Horses blood, and drink good Wine and strong Drink, keep thy Body warm clad, thy House warm and dry, cast all care from you, and relieve those that are in want with thy Charity: Thus have I ended these Observations which I lay down for thy advantage, make good use of them, and God be thy Glory.
